LINDSAY LAKE FARMS

FORESTRY FLEET

# ABOUT US

---

## **Welcome to Lindsay Lake Farms - Your Expert in Forestry, Wood and Wood Energy!**

With a proud 25 years of experience in forestry, Lindsay Lake Farms stands as an expert in the sustainable management of forests. Our extensive expertise and passion for the forest form the foundation of our commitment to responsible forest management on our farm as well as for our customers.

### **Environmental Awareness and Sustainability**

Our philosophy is clear: we are passionately dedicated to environmental protection and advocate for sustainable forest management. Built on a strong legacy, we bring a wealth of experience to every project.

### **Innovative Technology and State-of-the-Art Machinery**

Benefit from our experience as we employ the latest machinery and innovative technology to provide not only the highest quality but also an unparalleled level of safety and efficiency. The continuous integration of cutting-edge technologies, coupled with our deep-rooted knowledge, allows us to provide effective solutions for the challenges in the industry.

---

## Our Services at a Glance:

- **Forest Management:** Leverage our extensive expertise in the professional care and sustainable management of forests, ensuring the preservation of their health and vitality.
- **Timber Harvesting:** Using state-of-the-art machinery and drawing on our extensive expertise, we conduct the gentle and efficient harvesting of wood, always in harmony with the principles of sustainability.
- **Wood Energy Generation:** Our proud legacy and commitment to responsible practices extend to the development and implementation of innovative solutions for sustainable energy generation from wood.
- **Consultation:** Rely on our experts, backed by a quarter-century of hands-on experience, to provide you with tailored solutions for your specific requirements.

With Lindsay Lake Farms, you have a partner who not only stands for excellent services but also brings a proud legacy of 25 years in forestry, actively contributing to the protection of our environment. Let us join forces to tackle the challenges of tomorrow and shape a sustainable future for generations to come.

# PONSSE FOX

# HARVESTER

This eight-wheeled machine is made for thinning to promote new growth, restore the natural forest structure with a focus on tree density, tree species distribution, tree age distribution and natural gaps in the canopy.

The Fox Harvester can quickly cut and sort energy wood, saw logs and studwood. With its light weight, stability and low surface pressure this machine is perfect to all demanding conditions and soft grounds.

# PONSSE BUFFALO KING FORWARDER

With our Forwarder we are able to guarantee efficient timber transportation.

If clearing land is required it's wildly effective due to its weight capacity of 18,000kg.

Fast, efficient, powerful.  
Buffalo King – The one for the  
job!

# PRIME TECH 300

## TRACK MULCHER

Forestry mulching provides quick and pleasurable results, as it immediately leaves a layer of organic material that is both functional and attractive while simultaneously eliminating the need for additional heavy equipment.

The PT-300 takes working on steep, soft, uneven and swampy terrains in stride. The oscillating undercarriage ensures a large contact surface, resulting in excellent stability. Mulching even trees and stumps up to 30cm in diameter.

Its wide tracks allow for elevated power and low ground pressure making it the perfect machine for expanding and developing pastures, blueberry fields, riding trails, ATV trails, clearing lots for homes & more.

The end product being a fine mulch helps to prevent soil erosion. As well as acts as fire buffer, especially beneficially near electrical lines, oil and gas pipelines. Give your property a chance at a new life!

# JOHN DEERE

## 750J DOZER

This Dozer is powerful and efficient, with its six way blade it is perfect for any landshaping, the wide tracks allow this machine to work even in swampy grounds with low ground pressure. Pushing earth, trees or rocks, building roads, or pulling vehicles through wet areas.

This dozer comes with the option of a removable heavy-duty rake attachment. The rake will handle bulky and unwieldy materials with minimal disturbance to the soil. Making this the perfect attachment for removing roots and eliminating rocks, debris and tree branches.

---

# MENZI MUCK

## A91 4X4

This is an extremely versatile European machine with 4 individually moveable legs. Various hydraulic cylinders enable the all-rounder to adapt its wheels and supports to any terrain. Allowing this machine to function at ease in difficult conditions.

With no further equipment the Menzi Muck can work in streams and waterways up to a depth of 2.5 meters.

The telescopic arm can reach and extend up to 9 meters.

With its tilting body able to adapt to the subsoil, the powerful all-wheel drive and the possibility to work on slopes up to 100% the range of use is almost inexhaustible, with boundaries nearly absent.

Tools and attachments include:

- Claw bucket
- Universal gripper
- Heavy Duty Saw Head
- Hydraulic Post Hammer
- Hydraulic demolition Hammer

All of which can rotate up to 360 degrees

# POSCHFENCE POST SHARPENER

This Austrian machine is the most practical and safe option for constructing your own fence posts. It will quickly debark, sharpen, and prepare any round timber.
